QUESTIONS OF THE WEEK

(Editor's note: Here are the questions asked most frequently by Virginia farmers during the past week as reported by county agricultural agents. Staff members of the VPI Agricultural Extension Service and/or Experiment Station supply the answers):

Q. I have not been able to seed my tobacco plant bed because of weather. What can I do to assure a fairly good supply of plants?

A. Plant as soon as you can. Locate the bed where it will be protected by thick woods on the north and west, if possible. The bed should have a southern or southeastern exposure, and should be on a good sandy loam or loam soil well supplied with organic matter. A light mulch of clean straw or pine needles will help save moisture and keep the bed warmer. Put the cover on as soon as the bed is seeded.

Q. Fall ow seeding and fertilization suggestions as listed in Leaflet 437, available from county agents, most frequently, Control weeds, insects, and diseases.

Q. Will there be a chemical available in 1961 to control the alfalfa weevil? This will have a bearing on whether or not many farmers will seed alfalfa this spring or fall?

A. There may be another acceptable chemical for use next year. However, the currently recommended chemicals, methoxychlor or malathion, will do a good job, if used properly.

Q. What is the lowest germination at which I can plant soybean seed?

A. An 80 per cent germination is usually the minimum recommended. You may not be able to find seed of that germination this year, but shop around and do as well as you possibly can.

Q. How effective are methoxychlor and malathion as sprays for the alfalfa weevil as compared to heptachlor?

A. They are very effective on immediate kill of the insects. There is, however, little residual effect, and two or more sprays will usually be necessary for control throughout the season.

Q. How late can we seed spring oats?

A. The recommended deadlines are April 1 in Piedmont and April 10 west of the Blue Ridge. However these dates can be extended safely when spring is late.

He asked that any and all forest fires be reported at once to David M. Smith, Chief Forest Warden for Appomattox County and asked use of his telephone number: 2029 for that purpose.

REPORT FROM LOCAL WEATHER STATION

According to Mrs. John Taylor, local reporter for the Weather Bureau, there have been 2.18 inches of rainfall thus far in April. This was added to heavy snowfalls during March, to produce a rather wet situation in this area.

During March there were 19 inches of snow, plus some rain, to make that month a rather wet one.

The heaviest snowfall came on March 3, with 11 inches.

The end result has been to delay farm and garden activities. But hopes are held out for a warming period, which with wind and sunshine are expected to get normal work back into stride.

IN MEMORIAM

FERGUSON: In sad but loving remembrance of my dear Daddy, Benjamin M. Ferguson, who departed this life April 10th, 1951.

To those who never knew you,
The world may seem the same,
But to us who loved and lost you,
Life's but a bitter pain.

Our smiles may hide our tears,
But memories keep the wound open
Despite the passing years.

IN MEMORIAM

In sad but loving remembrance of our dear Mother, Mrs. A. B. Ferguson, who departed this life 12 years ago today, April 7, 1948.

Twelve years ago today you left us,
So sad was that day.
God took you in His loving arms,
And then turned out the light.
How we miss your sweet smiling face,
Dear Mother, no one can take your place.
Some may think we are happy,
When they see us smile,
But they little know the sorrow
That we suffer all the while.
No one knows our sorrow,
A few have seen us weep,
But the way our hearts ache for you
Dear Mother and wish you were here
To guide us from day to day as
You used to do. All we can do now
Is remember the sweet lesson you
Taught us and ask Jesus to guide us
From day to day 'till we are
In your loving arms for the
Sweet reunion together.
